

## **“At the center of it all” in downtown Reno, Nevada, Siri’s casino chooses Table Trac’s CasinoTrac system**

MINNETONKA, MN, September 5, 2017 – Siri’s Casino of Reno, Nevada has contracted with Table Trac, Inc. (OTCQB: TBTC) to replace their existing online slot ticketing system with the CasinoTrac system. Siri’s joins a growing number of Nevada casinos that have chosen Table Trac’s newly approved system in Nevada.

Siri’s Casino, located in downtown Reno under the Reno Arch, is Reno’s newest casino. Featuring over 90 slot and video poker machines in a newly remodeled South Beach themed space, Siri’s hosts a massive daiquiri and craft beer bar as well as Reno’s hidden hot-spot for tasty fast food. Using the innovative marketing features of the CasinoTrac system, Siri’s will introduce new full featured players club offering rewards, and fun ways to win bonuses.

*“Siri’s is a fun and exciting casino for us to convert,”* said Chad Hoehne, President of Table Trac. *“We enjoy bringing the feature rich easy to use system to Nevada casinos that, prior to the approval of CasinoTrac, did not have a practical affordable path to the advanced system features that we offer.”*

Jeff Siri, manager of Siri’s Casino, stated, *“Siri’s Casino opened in 2014 and has not had a slot player tracking system. With the addition of CasinoTrac we will now be able to offer our customers the benefits of a players club, which is further enhanced by the fact that the system will be linked to the Club Cal Neva, allowing customers to have a single players card that will work in both casinos. We are excited to have this state of art accounting and player tracking system, which will enhance the gaming experience and customer loyalty at Siri’s Casino.”*
